**PRICES ARE PUBLISHED AS A GUIDE ONLY** to sales at the manufacturer level in carload or similar volumes during the week of publication. No attempt is made to predict future prices or trends. Specific sales, because of variations in stock quality and tallies, result in prices that are higher or lower than those published. The report is based on sizes and grades that conform to Product Standard 20-15 and on surfacing, grademarking and discounts that conform to general industry practices; on stock that originates in the principal producing region for each species; and on random-length loadings that contain a normal assortment of the lengths most desired in each size.

1-Prices delivered in Canadian funds, GST not included.

**Canadian Panel Price Methodology:** Many of the delivered Canadian OSB prices and all of the Spruce and Douglas Fir plywood prices on this page originated in the former Crow's newsletter. All delivered OSB prices in this section are derived from weekly market price assessments. The Spruce and Douglas Fir plywood prices are all derived from the Toronto 3/8-inch price. The 3/8-inch prices for other destinations are based on freight adders or deducts using Toronto as the base. In each destination column, the price for each thickness below the 3/8-inch price is derived from formulas using 3/8-inch as the basis. The 1-inch panel prices reflect additional costs at the manufacturing level.

# PRICE GUIDE

# International Item Codes

Item codes used to identify International prices for spreadsheet and database files.

**[mbf/msf m<sup>3</sup>]** Prices are in U.S. (\$) or Canadian (\$) currencies. Prices are gathered in board feet/square feet and converted to cubic meters. For conversion factors, see [www.ripi.com](http://www.ripi.com). Go to In Depth > Useful Data > Conversion Factors, or call Random Lengths at 1-888-686-9925. **Prices are published as a guide only.** No attempt is made to predict future prices or trends. Specific sales may be higher or lower because of variations in stock quality, tallies, and other factors.

## Prices to Exporters

Report is sorted alphabetically by Item Description. Retired items do not appear in the current price guides, but are available in the price history database. For details on how to select retired item codes in My Print, see the end of this report.

## My Print Detailed Instructions

Retired items do not appear in the current price guides, but are available in the price history database. To select a retired item for a My Print report:

> First, make sure that on the General Report Settings page, you select a date range that includes the period when the retired tag was actively reported.

> Second, type the retired item code that appears in the Retired Item Code column in this report manually on the Report Items and Template page, then click ADD. Retired items don't appear in the interactive RL Price Guide when you select the Select Your Items button.

If the retired item code might be considered to have a continuous history with a current item code, the current item code appears in the Current Item Code column in this report.

My Print users may use both the retired and current item codes to display both price histories. To make both lines appear to be the same line in the graph, Go to the Report Items and Template page, and select the same Item Color and Series Type for both the retired and current item, so they appear to be the same line when plotted in the graph. Both the current and retired item codes will appear in the legend.
